

Click & Collect Policy

Customers placing an order online can choose Click & Collect to pick up their order at any participating store location, free of charge, instead of having it shipped.

Orders selected for Click & Collect are typically ready for pickup within 2-4 hours during store opening hours for in-stock items, and within 1-2 business days if the item needs to be transferred from another store or the central warehouse.

Customers receive an SMS and email notification once their order is ready for pickup, including a pickup code that must be presented, along with a valid ID, at the designated collection point in-store.

Click & Collect orders are held for 5 calendar days from the ready-for-pickup notification. If not collected within this window, the order is automatically cancelled and refunded to the original payment method.

Large appliances (washing machines, refrigerators) are NOT eligible for Click & Collect and must be delivered via the standard delivery service due to handling and installation requirements.

A customer may authorize another person to collect the order on their behalf by providing that person's name and ID number at the time of checkout; the authorized collector must present their own ID matching the name on file.
